

AMIT KUMAR

Portfolio | GitHub | Email | LinkedIn

Summary

Final-year Computer Science student specializing in AI-ML, skilled in Python, SQL, and problem-solving. Experienced in AI/ML and web development projects, with ongoing training in Ethical Hacking.

Skills

Programming: Python, C++, HTML, CSS, SQL

AI & Development: Artificial Intelligence, Machine Learning, Frontend & Backend Web Development

Tools & Technologies: Git/GitHub, Kali Linux, Canva

Other: Communication, Leadership, Problem-Solving, Project Management

Experience

Python Developer Intern

Feb 2025 – Mar 2025

OCTANET Services Pvt. Ltd. (Remote)

- Developed an **ATM simulation application using Python** with PIN authentication and transaction management.
- Implemented core banking operations including **balance inquiry, deposit, withdrawal, and transaction history**.
- Applied Python programming, debugging, and problem-solving skills to build and test the application.

Projects

AI Medical Report Simplifier | *Python, Streamlit, OpenAI*

Apr 2025

- Built an AI-powered web application to analyze medical reports and explain results in simple language.
- Added support for PDF/image uploads and interactive follow-up questions.

Objects Counting & Detection | *Python, YOLOv8, Computer Vision*

Nov 2024

- Built an object detection system supporting image, video, and live-camera inputs.
- Implemented real-time object detection, counting, and bounding-box visualization.

AI Recipe Maker | *Python, Streamlit, GPT*

Aug 2024

- Created a recipe generator based on available ingredients, cuisine, dietary preferences, and cooking time.
- Implemented optional GPT integration with an offline rule-based fallback.

Password Generator | *Python, Streamlit, QR Code*

Dec 2023

- Developed a customizable password generator with configurable password length and character options.
- Added password-strength indication and QR-code generation for convenient storage.

Certifications

Deloitte Australia – Technology Job Simulation

June 2025

Forage

- Completed a practical technology job simulation focused on coding and development.

Supervised Machine Learning: Regression

October 2024

IBM – Coursera

- Completed an online course focused on supervised machine learning and regression.

Cryptus Certified Ethical Hacker – CCEH (In Progress)

2026 – Present

Cryptus Cyber Security Pvt. Ltd.

- Training in ethical hacking, penetration testing, network security, web application security, and cyber attack simulations.

Education

Bennett University (Times of India Group)

Expected Aug 2027

B.Tech in Computer Science (AI-ML)

Greater Noida, Uttar Pradesh

Relevant Coursework: Data Structures & Algorithms, Machine Learning, Artificial Intelligence, OOP, Statistics, Computer Networks, Web Technology
